

DAILY REFERENCE GUIDE

THANK YOU FOR BUYING A WHIRLPOOL PRODUCT.
For even more complete user support, register your appliance at www.whirlpool.eu/register

Download the **Instructions for use** from the website <http://docs.whirlpool.eu>
Follow the procedure described on the last page.

Please read the content of the *Health & Safety and Installation Guides* thoroughly before you use this appliance.

The transit bolts must be removed before the appliance is used.

See the *Health & Safety and Installation Guides* for detailed instructions on how to remove the transit bolts.

PRODUCT DESCRIPTION

APPLIANCE

- 1. Top
- 2. Detergent dispenser
- 3. Control Panel
- 4. Lid handle
- 5. Door
- 6. Water filter - behind kick panel
- 7. Removable kick panel
- 8. Adjustable feet (2)

CONTROL PANEL

- 1. On/Off button
- 2. Programme selector
- 3. Start/Pause button
- 4. Led washing and drying phases button
- 5. Led door open /End of cycle button
- 6. Half spin button
- 7. Start delay button
- 8. Dry only button
- 9. Intensive rinse button
- 10. Dryness level button
- 11. Drying time button
- 12. Temperature button

SENSING THE DIFFERENCE

DETERGENT DISPENSER

Prewash Compartment

- Detergent for prewash

Main Wash Compartment

- Detergent for the main wash
- Stain remover
- Water softener

Softener compartment

- Softener
- Liquid starch

Pour softener or starch solution into the compartment without exceeding the "max" level.

Release button

(press to remove tray for cleaning).

Preferably use the partition **A** when washing with a liquid detergent for washing, to ensure that the correct quantity of detergent is used (the partition is included in the bag containing the instructions). Move the partition into slot **B** when using detergent powder.

FIRST TIME USE

See the section *DAILY USE* for instructions on selecting and starting a programme.

FIRST CYCLE OPERATION

Remove any manufacturing debris:

1. Select the "Cotton" programme with a temperature setting of 90 °C.
2. Pour a small quantity of detergent powder into the main wash compartment of the detergent dispenser (maximum 1/3 of the quantity the detergent manufacturer recommends for lightly soiled laundry).
3. Start the programme **without loading the washer dryer machine** (with empty drum).

DAILY USE

For more information on functions, a more detailed guide may be requested or downloaded from the website following the instructions given on the last page. 

1. LOADING LAUNDRY.

- Prepare the laundry, following the recommendations given in the section "HINTS AND TIPS". - Open the door and load the laundry into the drum, without exceeding the maximum load capacities indicated in the *Programme Chart*. 
- Close the door, pressing until the latch audibly locks, and check that there is no laundry trapped between the door glass and the rubber seal.  

2. OPEN THE WATER TAP

Check that the washer dryer is connected correctly to the water mains. Open the water tap. 

3. SWITCHING ON THE WASHER DRYER MACHINE.

Press button ; the lamp  flashes slowly.

4. SELECTING A PROGRAMME AND CUSTOMISING A CYCLE.

The following functions are possible with this appliance:

- Wash only
- Wash and dry
- Dry only

Wash only

Select the required programme with the PROGRAMME selector dial. The washer-dryer automatically displays the maximum temperature specified for the programme set, via the corresponding led light. Press the relevant button to change the temperature.

- Pressing the "Temp. °C" button reduces the temperature progressively, to a minimum of 20 °C. Pressing the button again will return to the maximum temperature permitted for the programme.

Select the required options (if necessary).

- Press the button to select the option; the respective button lamp illuminates.
- Press the button again to cancel the option; the lamp extinguishes.

! If the selected option is not compatible with the programme set, an error warning tone sounds and the indicator lamp flashes three times. The option is not selected.

Wash and dry

To wash and dry a load with no interruption between the wash and dry cycles, make sure that the load does not exceed the maximum permissible drying load for the selected programme (see the column "Max. load for drying cycle" in the *Programme chart*).

1. Follow the instructions given in the paragraph "Wash Only" to select and, if necessary, customise the required programme.
2. Select the type of drying desired, by pressing the "Dryness level" button for automatic drying levels or the "Drying time" button to set drying time.

- Automatic drying with selectable levels:

In automatic drying mode, the washer dryer machine dries the laundry until the set level of dryness is reached. Pressing button "Dryness level" once automatically selects the highest drying level available for the selected programme. Press the button again to reduce the drying level.

The following levels are available:

Wardrobe : laundry is completely dry and ready to be put away in the wardrobe without ironing.
Hanger : laundry is left slightly damp to minimise creasing. Garments must be hung to air dry completely.
Iron : garments are left reasonably damp to make ironing easier.

- Timer drying mode:

To set a specific drying time, press the "Drying time" button until the led for the desired time is illuminated. Values from 180 to 40 minutes are settable.

To wash a load of laundry larger than the maximum permissible load for drying (see the column "Max. load for drying cycle" in the *Programme chart*), remove a few garments once the washing cycle has finished before starting the drying cycle. Proceed as follows:

1. Follow the instructions given in the paragraph "Wash Only" to select and, if necessary, customise the required programme.
2. Do not include a drying cycle.
3. Once the washing cycle is finished, open the door and remove a few garments to reduce the load. Now follow the instructions for "Dry only".

N.B.: always allow a cooling down period after drying before opening the door.

When using the two preset cycles "Wash & Dry 45'" and "Wash & Dry 90'", it is not necessary to select and start a drying cycle.

Dry only

This function is used to simply dry a wet load washed previously in the washer dryer or by hand.

1. Select a suitable programme for the laundry you want to dry (e.g. select cotton to dry wet cotton laundry).
2. Press button "Dry only" to dry without a wash cycle.
3. Select the type of drying desired, by pressing the "Dryness level" button for automatic drying levels or the "Drying time" button to set drying time.

- Automatic drying with selectable levels:

In automatic drying mode, the washer dryer machine dries the laundry until the set level of dryness is reached. Pressing button "Dryness level" once automatically selects the highest drying level available for the selected programme. Press the button again to reduce the drying level.

The following levels are available:

Wardrobe : laundry is completely dry and ready to be put away in the wardrobe without ironing.
Hanger : laundry is left slightly damp to minimise creasing. Garments must be hung to air dry completely.
Iron : garments are left reasonably damp to make ironing easier.

- *Timer drying mode:*

To set a specific drying time, press the "Drying time" button until the led for the desired time is illuminated. Values from 180 to 40 minutes are settable.

N.B.: always allow a cooling down period after drying before opening the door.

5. USING THE CORRECT AMOUNT OF DETERGENT. Pull out the tray and pour detergent into the relative compartments as described in "*Detergent dispenser*". This is only necessary when using a wash only or a wash + dry programme.

6. DELAYING THE START OF A PROGRAMME. To set a programme to start at a later time, see the section "*Options and Functions*".

7. STARTING A PROGRAMME.

Press the START/PAUSE button. The corresponding indicator light is illuminated, the door locks and the door open  symbol extinguishes. To change a programme while a cycle is in progress, press START/PAUSE to pause the washer dryer (the START/ PAUSE lamp flashes amber slowly); then select the required cycle and press START/PAUSE again. To open the door while a cycle is in progress, press START/PAUSE; the door may be opened if the  symbol lights. Press the START/ PAUSE button again to resume the programme from where it was paused.

8. CANCELLING A RUNNING PROGRAMME (IF NECESSARY)

Press and hold the button  until the washer dryer stops. If the water level and temperature are low enough, the door unlocks and may be opened.

The door remains locked if there is water in the drum. To unlock the door, switch the washer dryer on and select the SPIN & DRAIN programme. The water is emptied and the door unlocks at the end of the programme.

9. SWITCHING THE WASHER DRYER OFF AT THE END OF A PROGRAMME.

At the end of the programme, the door open  light will switch on. The door can only be opened when the  symbol lights. Check that the door open light is on, then open the door and remove the laundry.

Press  to switch the washer dryer off. To save energy, if the washer dryer is not switched off manually with the  button, it turns off automatically approximately 30 minutes after the end of the programme.

Leave the door ajar to let the interior of the washer dryer dry.

HINTS AND TIPS

RULES FOR SEPARATING LAUNDRY

- Fabric type / indications on label (cotton, mixed fibres, synthetic, wool, handwash items)
- Colour (separate coloured garments from whites, wash new coloured items separately)
- Size (wash items of different sizes in the same load to improve washing efficacy and weight distribution in the drum)
- Delicates (place small items – such as nylon stockings – and garments with clasps – such as braziers – in a laundry bag or in a pillow case with a zip).

EMPTY POCKETS

- Objects such as coins or safety pins can damage laundry and the washer dryer drum.

WASH SYMBOLS

ON GARMENT LABELS

The value given in the tub symbol is the maximum temperature possible for washing the garment.

-  Normal mechanical action
-  Reduced mechanical action
-  Much reduced mechanical action
-  Hand wash only
-  Do not wash

CLEAN THE WATER FILTER REGULARLY

- This is needed to prevent the filter from blocking and preventing the water from draining correctly. See the section “*Cleaning and Maintenance*” / “*Cleaning the water filter*” in the detailed guide that may be requested or downloaded from the website.  [www](#)

SAVING ENERGY AND PROTECTING THE ENVIRONMENT

- Keeping within the load limits indicated in the programme chart will optimise energy, water and detergent consumption and reduce washing times.
- Do not exceed the detergent quantities recommended by the detergent manufacturer.
- Save energy by using a 60°C instead of a 90°C wash programme, or by using a 40°C instead of a 60°C wash programme. We recommend using the “e Cotton” 60 °C programme for cotton garments, which is longer but uses less energy.
- To save energy and time when washing and drying, select highest spin speed available for the programme to reduce the residual water remaining in the garments at the end of the wash cycle.

PROGRAMME CHART

Programme	Available temperatures	Max. spin speed (rpm)	Drying	Max. load for wash cycle (kg)	Max. load for drying cycle (kg)	Duration (Minutes)	Detergents and additives			Recommended detergent	
							Prewash	Main	Softener	Powder	Liquid
COTTON	20°C - 90°C	1200	✓	7	5	200	-	●	○	✓	✓
SYNTHETICS (3)	20°C - 60°C	1000	✓	4,5	4	140	-	●	○	✓	✓
RAPID 30'	20°C - 30°C	800	-	3,5	-	30	-	●	○		✓
SPORT	20°C - 40°C	600	✓	4	4	100	-	●	○		✓
WASH & DRY 45'	30°C	1200	✓	1	1	45	-	●	○		✓
WASH & DRY 90'	30°C	1200	✓	2	2	90	-	●	○		✓
SPIN & DRAIN	-	1200	✓	7	5	10	-	-	-		
RINSE & SPIN	-	1200	✓	7	5	50	-	-	○		
COTTON+PREWASH	20°C - 90°C	1200	✓	7	5	215	●	●	○	✓	
☺ COTTON (1)	20°C - 60°C	1200	✓	7	5	175	-	●	○	✓	✓
☺ COTTON (2)	20°C - 40°C	1200	✓	7	5	160	-	●	○	✓	✓
WOOL	20°C - 40°C	800	✓	2	2	90	-	●	○		✓

COLOURS	20°C - 40°C	1200	✓	7	5	125	-	●	○		✓
MIXED	20°C - 40°C	1000	✓	4,5	4,5	90	-	●	○		✓

Selectable/optional - Not selectable/applicable ● Required quantity ○ Optional quantity

For wash programmes with temperatures above 50°C, we recommend using powder detergent rather than liquid, and following the directions given on the detergent package.

- 1) Test programme in compliance with standard EN 50229 (Wash): select the "☺ Cotton" programme with a temperature of 60°C.
- 2) Long cotton programme: set the "☺ Cotton" programme with a temperature of 40°C.
- 3) Long wash cycle for synthetics: set wash cycle SYNTHETICS with a temperature of 40°C.

The cycle duration indicated on the display or in the manual is an estimated time calculated for standard conditions. The actual cycle time may vary in relation to a number of different factors, such as inlet water temperature and pressure, ambient temperature, quantity of detergent, size and type of load, load balancing and any additional optional functions selected.

AUTOMATIC DRYING LEVEL TIMING CHART

Fabric type	Max. load. (kg)	Wardrobe level 	Hanger level 	Iron level
COTTON	5	260'	220'	180'
SYNTHETICS	4	180'	160'	120'
WOOL	2	155'	130'	120'

The time given is purely indicative and refers to the maximum load; with smaller loads, drying times will be reduced.

Test programme in compliance with standard EN 50229 (Drying): the smaller load (2kg) must be dried by selecting the dryness level. The load must consist of 2 sheets, 1 pillowcase and 1 hand towel; the remainder of the load must be dried by selecting the dryness level.

PROGRAMMES

Follow the directions indicated in the garment wash symbols.

COTTON

for washing normally to heavily soiled towels, underwear, table and bed linen etc. in resilient cotton and linen.

SYNTHETICS

for washing normally soiled garments made from synthetic fibres (such as polyester, polyacrylic, viscose etc.) or cotton/synthetic blends.

RAPID 30'

for washing lightly soiled garments quickly: this cycle lasts only 30 minutes, saving time and energy. Maximum load 3,5 Kg.

SPORT

for washing lightly soiled sports clothing (tracksuits, shorts, etc.); for best results, we recommend not exceeding the maximum load indicated in the "Programme chart". We recommend using liquid detergent, and adding the amount suitable for a half-load.

WASH & DRY 45'

for washing and drying lightly soiled cotton and synthetic fibre garments quickly. This cycle washes and dries a laundry load of up to 1 Kg in just 45 minutes.

WASH & DRY 90'

for washing and drying cotton and synthetic fibre garments quickly. This cycle washes and dries a laundry load of up to 2 Kg in just 90 minutes.

SPIN & DRAIN

spins the load then empties the water. For resilient garments.

RINSE & SPIN

rinses and then spins. For resilient garments.

COTTON+PREWASH

for washing heavily soiled towels, underwear, table and bed linen etc. in resilient cotton and linen where a prewash is required. Use only powder detergent in the "Main Wash Compartment".

COTTON

for washing normally soiled cotton garments. At 60°C, this is the standard cotton programme and the most efficient and terms of water and energy consumption.

WOOL

all wool garments can be washed using programme "Wool", even those carrying the "hand-wash only"  label. For best results, use special detergents and do not exceed 2 kg of laundry.

DELICATES

for washing particularly delicate garments. Preferably turn garments inside out before washing.

COLOURS

for washing coloured cotton garments. This programme is optimised to keep colours bright even after repeated washing.

MIXED

for washing lightly to normally soiled resilient garments in cotton, linen, synthetic fibres and mixed fibres.

OPTIONS AND FUNCTIONS

OPTIONS selectable directly by pressing the relative button

! If the selected option is not compatible with the programme set, an error warning tone sounds and the indicator lamp flashes three times. The option is not selected.

START DELAY

To set the a delayed start for the selected programme, press the button until the led for the desired delay is illuminated (9h - 6h - 3h). To cancel the delayed start, press the button until all e lights are switched off

HALF SPIN

This option reduces the spin speed of the wash programme selected by half

INTENSIVE RINSE

Selecting this option adds an additional rinse, ensuring optimal detergent removal. It is particularly suitable for those with sensitive skin.

MAINTENANCE AND TROUBLESHOOTING GUIDE

See the **Instructions for use** for instructions on maintenance procedures and troubleshooting problems.

TECHNICAL DOSSIER

The technical dossier containing energy consumption figures may be downloaded from the Whirlpool website <http://docs.whirlpool.eu>

CONTACTING THE AFTER-SALES SERVICE

When contacting the After-Sales Service, you will need to be able to provide the codes indicated on the adhesive label on the inner side of the door. The telephone number is indicated in the warranty booklet.

HOW TO RECEIVE THE INSTRUCTIONS FOR USE

- > Phone the After-Sales Service
- > Use this QR Code

- > Download the guide from the Whirlpool website

<http://docs.whirlpool.eu>

To do this, you need to enter the correct commercial code of the product indicated on the adhesive label.
