### Instruction Sheet, 14

# Installation

GB

! This instruction manual should be kept in a safe place for future reference. If the washer-dryer is sold, transferred or moved, make sure that the instruction manual remains with the machine so that the new owner is able to familiarise himself/herself with its operation and features.

! Read these instructions carefully: they contain vital information relating to the safe installation and operation of the appliance.

## Unpacking and levelling

### Unpacking

1. Remove the washer-dryer from its packaging.
2. Make sure that the washer-dryer has not been damaged during the transportation process. If it has been damaged, contact the retailer and do not proceed any further with the installation process.

3. Remove the 4 protective screws (used during transportation) and the rubber washer with the corresponding spacer, located on the rear part of the appliance (see figure).

4. Close off the holes using the plastic plugs provided.
  5. Keep all the parts in a safe place: you will need them again if the washer-dryer needs to be moved to another location.
- ! Packaging materials should not be used as toys for children.

### Levelling

1. Install the washer-dryer on a flat sturdy floor, without resting it up against walls, furniture cabinets or anything else.

2. If the floor is not perfectly level, compensate for any unevenness by tightening or loosening the adjustable front feet (see figure); the angle of inclination, measured in relation to the worktop, must

not exceed 2°.

Levelling the machine correctly will provide it with stability, help to avoid vibrations and excessive noise and prevent it from shifting while it is operating. If it is placed on carpet or a rug, adjust the feet in such a way as to allow a sufficient ventilation space underneath the washer-dryer.

## Connecting the electricity and water supplies

### Connecting the water inlet hose

1. Connect the inlet hose by screwing it to a cold water tap using a 3/4 threaded connection (see figure).

Before performing the connection, allow the water to run freely until it is perfectly clear.

2. Connect the inlet hose to the washer-dryer by screwing it onto the corresponding water inlet of the appliance, which is situated on the top right-hand side of the rear part of the appliance (see figure).

3. Make sure that the hose is not folded over or bent.

! The water pressure at the tap must fall within the range of values indicated in the Technical data table (see next page).

! If the inlet hose is not long enough, contact a specialised shop or an authorised technician.

! Never use second-hand hoses.

! Use the ones supplied with the machine.

## Connecting the drain hose

Connect the drain hose, without bending it, to a drain duct or a wall drain situated between 65 and 100 cm from the floor.

Alternatively, place the drain hose over the edge of a washbasin or bathtub, by fastening the guide (which can be purchased at the technical assistance centre) to the tap (see figure). The free end of the

hose should not be underwater.

**!** We advise against the use of hose extensions; if it is absolutely necessary, the extension must have the same diameter as the original hose and must not exceed 150 cm in length.

## Electrical connections

Before plugging the appliance into the mains socket, make sure that:

- the socket is earthed and in compliance with the applicable law;
- the socket is able to sustain the appliance's maximum power load indicated on the Technical Data Plate fixed on the machine;
- the supply voltage is included within the values indicated on the Technical Data Plate fixed on the machine.
- the socket is compatible with the washing machine's plug. If this is not the case, replace the socket or the plug.

Your appliance is now supplied with a 13 amp fused plug it can be plugged into a 13 amp socket for immediate use. Before using the appliance please read the instructions below.

**WARNING - THIS APPLIANCE MUST BE EARTHED.**  
THE FOLLOWING OPERATIONS SHOULD BE CARRIED OUT BY A QUALIFIED ELECTRICIAN.

### *Replacing the fuse:*

When replacing a faulty fuse, a 13 amp ASTA approved fuse to BS 1362 should always be used, and the fuse cover re-fitted. If the fuse cover is lost, the plug must not be used until a replacement is obtained.

### *Replacement fuse covers:*

If a replacement fuse cover is fitted, it must be of the correct colour as indicated by the coloured marking or the colour that is embossed in words on the base of the plug. Replacements can be obtained directly from your nearest Service Depot.

### *Removing the plug:*

If your appliance has a non-rewireable moulded plug and you should wish to re-route the mains cable through partitions, units etc., please ensure that either:  
the plug is replaced by a fused 13 ampere rewireable plug bearing the BSI mark of approval.

*or:*

the mains cable is wired directly into a 13 amp cable outlet, controlled by a switch, (in compliance with BS 5733) which is accessible without moving the appliance.

### *Disposing of the plug:*

Ensure that before disposing of the plug itself, you make the pins unusable so that it cannot be accidentally inserted into a socket.

Instructions for connecting cable to an alternative plug:

Important: the wires in the mains lead are coloured in accordance with the following code:

<b>Green &amp; Yellow</b>	<b>Earth</b>
<b>Blue</b>	<b>Neutral</b>
<b>Brown</b>	<b>Live</b>

As the colours of the wires in the lead may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

Connect Green & Yellow wire to terminal marked **E** or  $\equiv$  or coloured Green or Green & Yellow.

Connect Brown wire to terminal marked **L** or coloured Red.

Connect Blue wire to terminal marked **N** or coloured Black.

If a 13 amp plug (BS 1363) is used it must be fitted with a

13 amp fuse, either in the plug or adaptor or at the distribution board.

If you are in any doubt regarding the electrical supply to your machine, consult a qualified electrician before use.

How to connect an alternative plug:

The wires in this mains lead are coloured in accordance with the following code:

<b>BLUE</b>	<b>NEUTRAL (N)</b>
<b>BROWN</b>	<b>LIVE (L)</b>
<b>GREEN &amp; YELLOW</b>	<b>EARTH (E)</b>

*Disposing of the appliance:*

When disposing of the appliance please remove the plug by cutting the mains cable as close as possible to the plug body and dispose of it as described on the previous page.

! The washing machine should not be installed in an outdoor environment, not even where the area is sheltered, because it may be very dangerous to leave it exposed to damp, rain and thunderstorms.

! When the washing machine is installed, the mains socket must be within easy reach.

! Do not use extensions or multiple sockets.

! The power supply cable must never be bent or dangerously compressed.

! The power supply cable must only be replaced by an authorised serviceman.

Warning! The company denies all liability if and when these norms are not respected.

**The first wash cycle**

Once the appliance has been installed, and before you use it for the first time, run a wash cycle with detergent and no laundry, using the programme “Auto Clean” (see “Cleaning the washing machine”).

Technical data	
<b>Model</b>	RDPG 96207
<b>Dimensions</b>	width 59.5 cm height 85 cm depth 54 cm
<b>Capacity</b>	from 1 to 9 kg for the wash programme from 1 to 6 kg for the drying programme
<b>Electrical connections</b>	please refer to the technical data plate fixed to the machine
<b>Water connections</b>	maximum pressure 1 MPa (10 bar) minimum pressure 0.05 MPa (0.5 bar) drum capacity 58 litres
<b>Spin speed</b>	up to 1200 rotations per minute
<b>Test Programmes according to SASO 2885:2018</b>	programme “10”; temperature 60°C + antifoam

---

**Before contacting the Technical Assistance Service:**

- Check whether you can solve the problem alone (see “*Troubleshooting*”);
- Restart the wash cycle to check whether the problem has been solved;
- If this is not the case, contact an authorised Technical Assistance Centre.

! Always request the assistance of authorised technicians.

**Have the following information to hand:**

- the type of problem;
- the appliance model (Mod.);
- the serial number (S/N).

This information can be found on the data plate applied to the rear of the washer-dryer, and can also be found on the front of the appliance by opening the door.

# Care and maintenance

GB

## Cutting off the water and electricity supplies

- Turn off the water tap after every wash cycle. This will limit wear on the hydraulic system inside the washer-dryer and help to prevent leaks.
- Unplug the washer-dryer when cleaning it and during all maintenance work.

## Cleaning the washer-dryer

- The outer parts and rubber components of the appliance can be cleaned using a soft cloth soaked in lukewarm soapy water. Do not use solvents or abrasives.
- The washer-dryer has a auto clean programme for its internal parts that **must be run with no load in the drum**.

To help the wash cycle you may want to use either the detergent (i.e. a quantity 10% the quantity specified for lightly-soiled garments) or special additives to clean the washer-dryer. We recommend running a cleaning

programme every 40 wash cycles. To start the programme press button **A** for 5 seconds (see figure). The programme will start automatically and will run for about 70 minutes. To stop the cycle press the START/PAUSE button.

## Cleaning the detergent dispenser drawer

Remove the dispenser by raising it and pulling it out (see figure). Wash it under running water; this operation should be repeated frequently.

## Caring for the door and drum of your appliance

- Always leave the porthole door ajar in order to prevent unpleasant odours from forming.

## Cleaning the pump

The washer-dryer is fitted with a self-cleaning pump which does not require any maintenance. Sometimes, small items (such as coins or buttons) may fall into the pre-chamber which protects the pump, situated in its bottom part.

- ! Make sure the wash cycle has finished and unplug the appliance.

To access the pre-chamber:

1. using a screwdriver, remove the cover panel on the lower front part of the washer-dryer (see figure);

2. unscrew the lid by rotating it anti-clockwise (see figure): a little water may trickle out. This is perfectly normal;

3. clean the inside thoroughly;
4. screw the lid back on;
5. reposition the panel, making sure the hooks are securely in place before you push it onto the appliance.

## Checking the water inlet hose

Check the inlet hose at least once a year. If there are any cracks, it should be replaced immediately: during the wash cycles, water pressure is very strong and a cracked hose could easily split open.

- ! Never use second-hand hoses.

! This washer-dryer was designed and constructed in accordance with international safety regulations. The following information is provided for safety reasons and must therefore be read carefully.

## General safety

- This appliance was designed for domestic use only.
  - This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
    - Do not dry unwashed items in the tumble dryer.
    - Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the tumble dryer.
    - Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the tumble dryer.
    - Fabric softeners, or similar products, should be used as specified by the fabric softener instructions.
    - The final part of a tumble dryer cycle occurs without heat (cool down cycle) to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- WARNING: Never stop a tumble dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.
- Do not touch the machine when barefoot or with wet or damp hands or feet.
  - Do not pull on the power supply cable when unplugging the appliance from the electricity socket. Hold the plug and pull.
  - Do not open the detergent dispenser drawer while the machine is in operation.
  - Do not touch the drained water as it may reach extremely high temperatures.
  - Never force the porthole door. This could damage the safety lock mechanism designed to prevent accidental opening.
  - If the appliance breaks down, do not under any circumstances access the internal mechanisms in an attempt to repair it yourself.
  - Always keep children well away from the appliance while it is operating.
  - The door can become quite hot during the wash cycle.
  - If the appliance has to be moved, work in a group of two or three people and handle it with the utmost care. Never try to do this alone, because the appliance is very heavy.
  - Before loading laundry into the washer-dryer, make sure the drum is empty.
  - During the drying phase, the door tends to get quite hot.
  - Do not use the appliance to dry clothes that have been washed with flammable solvents (e.g. trichlorethylene).
  - Do not use the appliance to dry foam rubber or similar elastomers.

- Make sure that the water tap is turned on during the drying cycles.
- Children of less than 3 years should be kept away from the appliance unless continuously supervised.
- Remove all objects from pockets such as lighters and matches.
- This machine must not be operated in a non air-conditioned environment.

## Disposal

- Disposing of the packaging materials: observe local regulations so that the packaging may be re-used.
- The European Directive 2012/19/EU on Waste Electrical and Electronic Equipment, requires that old household electrical appliances must not be disposed of in the normal unsorted municipal waste stream. Old appliances must be collected separately in order to optimise the recovery and recycling of the materials they contain and reduce the impact on human health and the environment. The crossed out "wheeled bin" symbol on the product reminds you of your obligation, that when you dispose of the appliance it must be separately collected. Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.

# Description of the washer-dryer

GB

## Control panel

**Detergent dispenser drawer:** used to dispense detergents and washing additives (see “Detergents and laundry”).

**Programme Key:** the Programme Key inside the detergent dispenser shows all the available programmes together with a graphical guide on how to use the individual dispenser compartments.

**ON/OFF**  button: press this briefly to switch the machine on or off. The START/PAUSE indicator light which flashes slowly in a green colour shows that the machine is switched on. To switch off the washer-dryer during the wash cycle, press and hold the button for approximately 3 seconds; if the button is pressed briefly or accidentally the machine will not switch off.

If the machine is switched off during a wash cycle, this wash cycle will be cancelled.

**WASH CYCLE SELECTOR KNOB:** used to set the desired wash cycle (see “Table of programmes and wash cycles”).

**CLEANING ACTION** button and indicator light : to select the desired wash intensity.

**TEMPERATURE**  button: press to reduce or completely exclude the temperature; the value appears on the display.

**SPIN**  button: press to reduce or completely exclude the spin cycle; the value appears on the display.

**DELAY TIMER**  button: press to set a delayed start for the selected wash cycle; the delay period appears on the display.

**DRYING** button : press to decrease or exclude drying; the selected drying level or time will appear on the display.

**DRYING ONLY** button : press to run the drying cycle only.

**START/PAUSE** button and indicator light: when the green indicator light flashes slowly, press the button to start a wash cycle. Once the cycle has begun the indicator light will remain lit in a fixed manner. To pause the wash cycle, press the button again; the indicator light will flash in an amber colour. If the  symbol is not illuminated, the door may be opened. To start the wash cycle from the point at which it was interrupted, press the button again.

**CHILD LOCK** button: to activate the control panel lock, press and hold the button for approximately 2 seconds. When the symbol  is illuminated, the control panel is locked (apart from the ON/OFF button). This means it is possible to prevent wash cycles from being modified accidentally, especially where there are children in the home. To deactivate the control panel lock, press and hold the button for approximately 2 seconds.

### Standby mode

This washer-dryer, in compliance with new energy saving regulations, is fitted with an automatic standby system which is enabled after about 30 minutes if no activity is detected. Press the ON-OFF button briefly and wait for the machine to start up again.

Consumption in off-mode: 0,5 W

Consumption in Left-on: 8 W

## Display

The display is useful when programming the machine and provides a great deal of information.

The duration of the available wash cycles and the remaining time of a running cycle appear in section **A** (the display will show the maximum duration of the cycle chosen, which may decrease after several minutes, since the effective duration of the programme varies depending on the wash load and the settings chosen); if the DELAY TIMER option has been set, the countdown to the start of the selected wash cycle will appear.

Moreover, pressing the relative button allows for visualising the maximum values for the temperature, spin speed or type of drying relative to the selected programme or the most recently selected ones, if compatible with the selected programme.

The “wash cycle phases” corresponding to the selected wash cycle and the “wash cycle phase” of the running wash cycle appear in section **B**:

- Main wash
- Rinse
- Spin/Pump out
- Drying

The icons corresponding to “temperature”, “spin” and “drying” (working from the left) are displayed in section **C**. The “temperature” bars \* indicate the maximum temperature level which may be selected for the set cycle. The “spin” bars indicate the maximum spin level which may be selected for the set cycle. The symbol lights up while the drying settings are being adjusted.

### **DOOR LOCKED** indicator light:

The lit symbol indicates that the door is locked. To prevent any damage, wait until the symbol turns off before opening the door. To open the door while a cycle is in progress, press the START/PAUSE button; if the DOOR LOCKED symbol is switched off the door may be opened.

# How to run a wash cycle or a drying cycle

GB

1. **SWITCH THE MACHINE ON.** Press the  button; the START/PAUSE indicator light will flash slowly in a green colour.
2. **LOAD THE LAUNDRY.** Open the porthole door. Load the laundry, making sure you do not exceed the maximum load value indicated in the table of programmes and wash cycles on the following page.
3. **MEASURE OUT THE DETERGENT.** Pull out the detergent dispenser drawer and pour the detergent into the relevant compartments as described in “*Detergents and laundry*”.
4. **CLOSE THE DOOR.**
5. **SELECT THE WASH CYCLE.** Use the WASH CYCLE SELECTOR knob to select the desired wash cycle. A temperature and spin speed is set for each wash cycle; these values may be adjusted. The duration of the cycle will appear on the display.

6. **CUSTOMISE THE WASH CYCLE.** Use the relevant buttons:

#### Modify the temperature and/or spin speed.

The machine automatically displays the maximum temperature and spin speed values set for the selected cycle, or the most recently-used settings if they are compatible with the selected cycle. The temperature can be decreased by pressing the  button, until the cold wash “OFF” setting is reached. The spin speed may be progressively reduced by pressing the  button, until it is completely excluded (the “OFF” setting). If these buttons are pressed again, the maximum values are restored.

! Exception: if the **5** programme is selected, the temperature can be increased up to a value of 60°C.

! Exception: if the **6** programme is selected, the temperature can be increased up to a value of 60°C.

! Exception: if the **9** programme is selected, the temperature can be increased up to a value of 90°C.

#### Setting the drying cycle

The first time the button  is pressed, the machine will automatically select the maximum drying cycle which is compatible with the selected wash cycle. Subsequent presses will decrease the drying level and then the drying time, until the cycle is excluded completely (“OFF”).

Drying may be set as follows:

**A-** Based on the desired laundry dryness level:

**Iron “A1”:** suitable for clothes which will need ironing afterwards. the remaining dampness softens creases, making them easier to remove.

**Hanger “A2”:** ideal for clothes which do not need to be dried fully.

**Cupboard “A3”:** suitable for laundry which can be put back in a cupboard without being ironed.

**B -** Based on a set time period: between **30** and **210** minutes.

If your laundry load to be washed and dried is much greater than the maximum stated load, perform the wash cycle, and when the cycle is complete, divide the garments into groups and put some of them back in the drum. At this point, follow the instructions provided for a “Drying only” cycle. Repeat this procedure for the remainder of the load. A cooling-down period is always added to the end of each drying cycle.

#### Drying only

Press button  to perform the drying-only cycle. After selecting the desired cycle (compatible with the type of garments), press button  to exclude the washing phase and start the drying phase at the maximum level for the selected cycle. The drying level or time may be set and changed by pressing the drying button . (Not compatible with cycles 1-2-3-4 and 14).

#### Setting a delayed start.

To set a delayed start for the selected cycle, press the corresponding button repeatedly until the required delay period has been reached. To remove the delayed start setting, press the button until the text “OFF” appears on the display.

#### Set the desired wash intensity.

Option  makes it possible to optimise washing based on the level of soil in the fabrics and on desired wash cycle intensity. For heavily-soiled garments press  button until the “Intensive” level is reached. This level ensures a high-performance wash due to a larger quantity of water used in the initial phase of the cycle and due to increased drum rotation. It is useful when removing the most stubborn stains.

For lightly-soiled garments or a more delicate treatment of the fabrics, press  button until the “Délicate” level is reached. The cycle will reduce drum rotation to ensure washing results that are perfect for delicate garments.

7. **START THE WASH CYCLE.** Press the START/PAUSE button. The corresponding indicator light will turn green, remaining lit in a fixed manner, and the door will be locked (the DOOR LOCKED  symbol will be lit). To change a wash cycle while it is in progress, **pause the washer-dryer** using the START/PAUSE button (the START/PAUSE indicator light will flash slowly in an amber colour); then select the desired cycle and press the START/PAUSE button again.

To open the door while a cycle is in progress, press the START/PAUSE button; if the DOOR LOCKED  symbol is switched off the door may be opened. Press the START/PAUSE button again to restart the wash cycle from the point at which it was interrupted.

8. **THE END OF THE WASH CYCLE.** This will be indicated by the text “END” on the display; when the DOOR LOCKED  symbol switches off the door may be opened. Open the door, unload the laundry and switch off the machine.

! If you wish to cancel a cycle which has already begun, press and hold the  button. The cycle will be stopped and the machine will switch off.

**Table of programmes and wash cycles**

Wash cycles	Description of the wash cycle	Max. temp. (°C)	Max. speed (rpm)	Drying	Detergents		Max. load (kg)	Cycle duration	
					Wash	Fabric softener			
<b>ANTI CREASE</b>									
1	<b>Daily Wash &amp; Dry</b>	40°	800	●	●	●	3.5	The duration of the wash cycle can be checked on the display.	
2	<b>Shirts Wash &amp; Dry</b>	40°	1000	●	●	●	2		
3	<b>Pre Iron</b>	-	-	-	-	-	1.5		
4	<b>Steam Refresh</b>	-	-	-	-	-	1.5		
<b>DAILY CLEAN</b>									
5	<b>Cotton:</b> lightly soiled resistant and delicate colours.	40° (Max. 60°C)	1200	●	●	●	9		
6	<b>Synthetics:</b> lightly soiled resistant colours.	40° (Max. 60°C)	1000	●	●	●	4.5		
7	<b>Anti-Stain Quick</b>	40°	1200	●	●	●	4.5		
8	<b>Anti-Stain</b>	40°	1200	●	●	●	9		
9	<b>White:</b> heavily soiled whites and resistant colours.	60° (Max. 90°C)	1200	●	●	●	9		
10	<b>Eco Cotton</b> (1): heavily soiled whites and resistant colours.	60°	1200	●	●	●	9		
<b>SPECIALS</b>									
11	<b>Multicolor</b>	40°	1200	●	●	●	9		
12	<b>Ultradelicates</b>	30°	0	●	●	●	1		
13	<b>Wool:</b> for wool, cashmere, etc.	40°	800	●	●	●	2		
14	<b>Fast (**):</b> to refresh lightly soiled garments quickly (not suitable for wool, silk and clothes which require washing by hand).	30°	800	●	●	●	3.5		
<b>Partial Programmes</b>									
	<b>Rinse</b>	-	1200	●	-	●	9		
	<b>Spin+Pump out</b>	-	1200	●	-	-	9		
	<b>Pump out only *</b>	-	OFF	-	-	-	9		

\* If you select programme and exclude the spin cycle, the machine will drain only.

\*\* If a drying cycle is also programmed, the machine will run a “wash+dry” programme lasting 45’ with maximum spin speed and a 1kg laundry load.

The length of cycle shown on the display or in this booklet is an estimation only and is calculated assuming standard working conditions. The actual duration can vary according to factors such as water temperature and pressure, the amount of detergent used, the amount and type of load inserted, load balancing and any wash options selected.

1) Test Programmes according to SASO 2885:2018: set wash cycle “10” with a temperature of 60°C + antifoam.

# Detergents and laundry

GB

## Detergent dispenser drawer

Successful washing results also depend on the correct dose of detergent: adding too much detergent will not necessarily result in a more efficient wash, and may in fact cause build up on the inside of your appliance and contribute to environmental pollution.

! Use powder detergent for white cotton garments, for pre-washing, and for washing at temperatures over 60°C.

! Follow the instructions given on the detergent packaging.

! Do not use hand washing detergents; they create too much foam.

Open the detergent dispenser drawer and pour in the detergent or washing additive, as follows.

! Do not pour detergent into the middle compartment (\*).

### compartment 1: Detergent for the wash cycle (powder or liquid)

If liquid detergent is used,

it is recommended that the removable plastic partition A (supplied) be used for proper dosage. If powder detergent is used, place the partition into slot B.

### compartment 2: Additives (fabric softeners, etc.)

The fabric softener should not overflow the grid.

## Preparing the laundry

- Divide the laundry according to:
  - the type of fabric/the symbol on the label
  - the colours: separate coloured garments from whites.
- Empty all garment pockets and check the buttons.
- Do not exceed the listed values, which refer to the weight of the laundry when dry: see "Table of programmes and wash cycles".

### How much does your laundry weigh?

- 1 sheet 400-500 g
- 1 pillow case 150-200 g
- 1 tablecloth 400-500 g
- 1 bathrobe 900-1,200 g
- 1 towel 150-250 g

## Special wash cycles

**Daily Wash & Dry:** use programme 1 to wash and dry mixed garments (cotton and synthetics). This cycle may be used to wash and dry loads of up to 3.5 kg; we recommend the use of liquid detergent.

The use of the steam in this programme is optimised to reduce the formation of creases on garments, making them easier to iron.

**Shirts Wash & Dry:** use programme 2 to wash and dry shirts and T-shirts in different fabrics and colours to ensure maximum care. This cycle may be used to wash and dry loads of up to 2 kg. To achieve optimum results, use liquid detergent and pre-treat cuffs, collars and stains. The use of the steam in this programme is optimised to reduce the formation of creases on garments, making them easier to iron.

**Pre Iron:** use this programme immediately before ironing; max. 1.5 kg load. The use of the steam in this programme is optimised to reduce the formation of creases on garments, making them easier to iron.

**Steam Refresh:** for refreshing garments, neutralised unpleasant odours and relaxing the fibres by delivering steam into the drum. The garments will be damp at the end of the cycle.

**Anti-Stain Quick:** this programme is ideal for washing the most difficult daily stains in 1 hour. It is ideal for mixed fabrics and coloured garments, caring for your clothes as it washes. If the drying function is selected, a drying cycle automatically activates at the end of the wash cycle that resembles open-air drying, with the added advantages of preserving garments from yellowing due to sunlight exposure and preventing loss of whiteness caused by the possible presence of dust in the air. Dryness level "A2" recommended.

**Anti-Stain:** the programme is suitable to heavily-soiled garments with resistant colours. It ensures a washing class that is higher than the standard class (A class).

When running the programme, do not mix garments of different colours. We recommend the use of powder detergent. Pre-treatment with special additives is recommended if there are obstinate stains.

If the drying function is selected, a drying cycle automatically activates at the end of the wash cycle that resembles open-air drying, with the added advantages of preserving garments from yellowing due to sunlight exposure and preventing loss of whiteness caused by the possible presence of dust in the air. Dryness level "A2" recommended.

**Multicolor:** for washing coloured cotton garments. This programme is optimised to keep colours bright even after repeated washing.

**Ultradelicates:** use programme 12 to wash very delicate garments having strasses or sequins.

We recommend turning the garments inside out before washing and placing small items into the special bag for washing delicates. Use liquid detergent on delicate garments for best results.

When selecting an exclusively time-based drying function, a drying cycle is performed at the end of the wash cycle that is particularly delicate, thanks to light handling and appropriate temperature control of the water jet.

The recommended durations are:

- 1 kg of synthetic garments --> 150 min
- 1 kg of synthetic and cotton garments --> 180 min
- 1 kg of cotton garments --> 180 min

The degree of dryness depends on the load and fabric composition.

To wash silk garments and curtains select the cycle 12 and set the "Delicate" level from option .

### Wool - Woolmark Apparel Care - Green:

the wool wash cycle of this machine has been approved by The Woolmark Company for the washing of wool garments labelled as "hand wash" provided that the products are washed according to the instructions on the garment label and those issued by the manufacturer of this washer-dryer. (M1318)

## Load balancing system

Before every spin cycle, to avoid excessive vibrations before every spin and to distribute the load in a uniform manner, the drum rotates continuously at a speed which is slightly greater than the washing rotation speed. If, after several attempts, the load is not balanced correctly, the machine spins at a reduced spin speed. If the load is excessively unbalanced, the washer-dryer performs the distribution process instead of spinning. To encourage improved load distribution and balance, we recommend small and large garments are mixed in the load.

Your washer-dryer could occasionally fail to work. Before contacting the Technical Assistance Service (see “Service”), make sure that the problem cannot be solved easily using the following list.

<b>Problem:</b>	<b>Possible causes / Solutions:</b>
<b>The washer-dryer does not switch on.</b>	<ul style="list-style-type: none"><li>• The appliance is not plugged into the socket fully, or not enough to make contact.</li><li>• There is no power in the house.</li></ul>
<b>The wash cycle does not start.</b>	<ul style="list-style-type: none"><li>• The washer-dryer door is not closed properly.</li><li>• The ON/OFF button has not been pressed.</li><li>• The START/PAUSE button has not been pressed.</li><li>• The water tap has not been opened.</li><li>• A delayed start has been set.</li></ul>
<b>The washer-dryer does not fill with water (the text “H2O” flashes on the display).</b>	<ul style="list-style-type: none"><li>• The water inlet hose is not connected to the tap.</li><li>• The hose is bent.</li><li>• The water tap has not been opened.</li><li>• There is no water supply in the house.</li><li>• The pressure is too low.</li><li>• The START/PAUSE button has not been pressed.</li></ul>
<b>The washer-dryer continuously takes in and drains water.</b>	<ul style="list-style-type: none"><li>• The drain hose is not fitted at a height between 65 and 100 cm from the floor (see “Installation”).</li><li>• The free end of the hose is under water (see “Installation”).</li><li>• The wall drainage system is not fitted with a breather pipe.</li></ul> <p>If the problem persists even after these checks, turn off the water tap, switch the appliance off and contact the Technical Assistance Service. If the dwelling is on one of the upper floors of a building, there may be problems relating to water drainage, causing the washer-dryer to fill with water and drain continuously. Special anti-draining valves are available in shops and help to prevent this inconvenience.</p>
<b>The washer-dryer does not drain or spin.</b>	<ul style="list-style-type: none"><li>• The wash cycle does not include draining: some cycles require the draining process to be enabled manually.</li><li>• The drain hose is bent (see “Installation”).</li><li>• The drainage duct is clogged.</li></ul>
<b>The washer-dryer vibrates a lot during the spin cycle.</b>	<ul style="list-style-type: none"><li>• The drum was not unlocked correctly during installation (see “Installation”).</li><li>• The washer-dryer is not level (see “Installation”).</li><li>• The washer-dryer is trapped between cabinets and walls (see “Installation”).</li></ul>
<b>The washer-dryer leaks.</b>	<ul style="list-style-type: none"><li>• The water inlet hose is not screwed on properly (see “Installation”).</li><li>• The detergent dispenser drawer is blocked (for cleaning instructions, see “Care and maintenance”).</li><li>• The drain hose is not fixed properly (see “Installation”).</li></ul>
<b>The START/PAUSE indicator light flash rapidly and an error code appears on the display (e.g.: F-01, F-..).</b>	<ul style="list-style-type: none"><li>• Switch off the machine and unplug it, wait for approximately 1 minute and then switch it back on again.</li></ul> <p>If the problem persists, contact the Technical Assistance Service.</p>
<b>There is too much foam.</b>	<ul style="list-style-type: none"><li>• The detergent is not suitable for machine washing (it should display the text “for washer-dryers” or “hand and machine wash”, or the like).</li><li>• Too much detergent was used.</li></ul>
<b>The washer-dryer does not dry.</b>	<ul style="list-style-type: none"><li>• The appliance is not plugged into the socket, or not enough to make contact.</li><li>• There has been a power failure.</li><li>• The appliance door is not shut properly.</li><li>• A Delay Timer has been set.</li><li>• DRYING is in the OFF position.</li></ul>

# Instruction Sheet

GB

<b>Manufacturer's name</b>	Whirlpool EMEA S.p.A. - Socio Unico via Carlo Pisacane n.1 - 20016 Pero (MI) - Italy
<b>Description model</b>	RDPG 96207 S 60Hz
<b>Country of production</b>	Italy
<b>Rated Voltage (V)</b>	220/240 V
<b>Rated Frequency (Hz)</b>	60 Hz
<b>Rated Power (W)</b>	1850 W
<b>Net Weight (kg)</b>	66 kg
<b>Rated Capacity (kg)</b>	from 1 to 9 kg for the wash programme from 1 to 6 kg for the drying programme
<b>Annual Energy Consumption (kWh/year)</b>	kWh/year 195.42
<b>Annual Water Consumption (liters/year)</b>	liters/year 12893
<b>Dimensions</b>	width 59.5 cm height 85 cm depth 54 cm
<b>Connecting the drain hose</b>	Connect the drain hose, without bending it, to a drain duct or a wall drain situated between 65 and 100 cm from the floor. Alternatively, place the drain hose over the edge of a washbasin or bathtub, by fastening the guide  (which can be purchased at the technical assistance centre) to the tap. The free end of the hose should not be underwater. ! We advise against the use of hose extensions; if it is absolutely necessary, the extension must have the same diameter as the original hose and must not exceed 150 cm in length.
<b>Electrical connections</b>	Before plugging the appliance into the mains socket, make sure that: <ul style="list-style-type: none"> <li>• the socket is earthed and in compliance with the applicable law;</li> <li>• the socket is able to sustain the appliance's maximum power load indicated on the Technical Data Plate fixed on the machine;</li> <li>• the supply voltage is included within the values indicated on the Technical Data Plate fixed on the machine.</li> <li>• the socket is compatible with the washing machine's plug. If this is not the case, replace the socket or the plug.</li> </ul>
<b>General safety</b>	<ul style="list-style-type: none"> <li>• This appliance was designed for domestic use only.</li> <li>• This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.</li> <li>• Do not touch the machine when barefoot or with wet or damp hands or feet.</li> <li>• Do not pull on the power supply cable when unplugging the appliance from the electricity socket. Hold the plug and pull.</li> <li>• Do not open the detergent dispenser drawer while the machine is in operation.</li> <li>• Do not touch the drained water as it may reach extremely high temperatures.</li> <li>• Never force the porthole door. This could damage the safety lock mechanism designed to prevent accidental opening.</li> <li>• If the appliance breaks down, do not under any circumstances access the internal mechanisms in an attempt to repair it yourself.</li> <li>• Always keep children well away from the appliance while it is operating.</li> <li>• The door can become quite hot during the wash cycle.</li> <li>• If the appliance has to be moved, work in a group of two or three people and handle it with the utmost care. Never try to do this alone, because the appliance is very heavy.</li> <li>• Before loading laundry into the washer-dryer, make sure the drum is empty.</li> <li>• This machine must not be operated in a non air-conditioned environment.</li> </ul>
<b>Unpacking and levelling</b>	<ol style="list-style-type: none"> <li>1. Remove the washer-dryer from its packaging.</li> <li>2. Make sure that the washer-dryer has not been damaged during the transportation process. If it has been damaged, contact the retailer and do not proceed any further with the installation process.</li> <li>3. Remove the 4 protective screws (used during transportation) and the rubber washer with the corresponding spacer, located on the rear part of the appliance.</li> <li>4. Close off the holes using the plastic plugs provided.</li> <li>5. Keep all the parts in a safe place: you will need them again if the washer-dryer needs to be moved to another location.</li> </ol> <p>! Packaging materials should not be used as toys for children.</p>

The Gulf Conformity Marking on the product indicates the conformity with all the requirements of the Gulf Technical Regulation for Low Voltage Electrical Equipment and Appliances BD-142004-01
